

The Dräger X-plore Series

Dräger X-plore Filter Series:

The Dräger X-plore Filter Series is a reliable and cost-effective way to filter the contaminants from the air you breathe. This complete selection of filters and cartridges is universally compatible with all Dräger X-plore half & full face masks in the 3000 & 5000 series. The Dräger-specific bayonet connection makes it easy for anyone to attach filters and cartridges, guaranteeing you the highest level of user-safety.

ST-680-2002

Dräger X-plore 3300:

The limited life half mask. The right choice for those needing an economical yet comfortable solution.

ST-681-2002

Dräger X-plore 3500:

The reusable half mask respirator for demanding professional use. Constructed from DrägerFlex material, this respirator is designed for long term wear.

ST-682-2002

Dräger X-plore 5500:

The ideal solution for those needing a higher level of protection. This full face mask combines respiratory and eye protection.

The New Benchmark in Comfort and Use.

Dräger "FlexiFit" head harness:

So soft – you won't notice it under your hard hat. So flexible this head harness adjusts for a comfortable fit on any head – without hair entanglement.

Flexible nose seal:

Unique flexible design fits to all nose types. You can always count on a leak-free seal and a great fit with safety glasses.

Compact, low-profile design:

The swept-back position of the filters guarantees a wide field of vision free from obstruction. There is also enough space to easily use visors and face shields. Available in three sizes, a perfect fit for every type of face is available.

Dräger X-plore 3500

New

„DrägerFlex“ material:

Developed especially for the Dräger X-plore 3500 mask body, DrägerFlex combines hypoallergenic properties with excellent resistance – giving you a soft, comfortable seal without skin irritation.

„Drop Down“ system:

Allows you to remove the mask from your face without removing a hard hat or face shield. Simply open the clips on the back of your neck and the respirator slides down from your face – and sits protected from dirt and grime.

Innovative X-guided strap system:

Cross over straps ensure an even weight distribution of the mask on your face – giving you ultimate comfort without pressure.

Safe & easy bayonet connection:

A unique two-point bayonet connector allows both filters to attach to the mask with the same technique. Filters only go in one way – so you can't get it wrong! Place the filter in the connection and turn a half turn downwards, the filter gently clicks into place.

Dräger X-plore 3300

Your economical alternative (does not include DrägerFlex-Material or the „Drop Down“ system.)
