

Dräger X-plore® 1700

Breathe easier and work safely. For over 100 years, Dräger has followed this philosophy when developing respiratory protection products. As customers' requests, requirements, and regulations constantly change in today's working environment, Dräger continuously strives for new and improved respiratory protection solutions.

The Dräger X-plore® 1700 series has been developed in cooperation with users for the specific requirements in the areas of industry, specialized trades and services. It sets new standards for comfort and use, performance and protection, along with modern design.

Dräger X-plore® 1700 is the new generation of particle filtering face pieces. With its CoolSAFE™ filter material it offers effective protection against fine dust, as well as solid and liquid particles. The Dräger X-plore® 1700 series offers a wide variety of different masks to meet the needs of different application areas.

Users can choose between two NIOSH protection classes: N95 and R95 which are optionally available with the CoolMAX™ exhalation valve for additional comfort. Odor stopping versions, containing an activated carbon layer are ideal for users which battle with unpleasant nuisance odors. All versions are NIOSH approved.

COOLSAFE™ FILTER MATERIAL

The specially developed CoolSAFE™ filter material combines various high-performance filter media to achieve an excellent filter performance. Coarse and fine particles are effectively stopped in the various filter layers. At the same time, the breathing resistance remains very low, allowing the user to work easily and without tiring for longer periods.

Setting new benchmarks in comfort, protection and material

CoolSAFE™ filter material

Performance that makes a difference: CoolSAFE™ filter material produced from high-performance filter media ideally combines low breathing resistance and high filter performance in one mask.

Flexible nose clip

Ensures a great fit, in the most critical area.

Soft inner layer

Comfortable to wear: the inner material layer is not only soft and hypo-allergenic, but also repels moisture thanks to its hydrophobic properties, keeping breathing resistance constantly low, when used for longer periods of time.

Folded form

All Dräger X-plore® 1700s are flat-folded, saving space and making them easier to transport.

Hygienic individual packaging

Each facepiece is individually packed in a plastic bag, ensuring it stays clean and hygienic.

VarioFLEX™ head harness

This continuous loop head harness is constructed from a stable, elastic, textile strap which is easy to don and doff while sitting comfortably with minimal pressure. The soft, tear-proof elastic easily stretched to fit various sizes of head and prevents hair entanglement.

CoolMAX™ exhalation valve (optional)

Breathe easy and comfortably: thanks to an extremely low breathing resistance. Additionally, the specially engineered CoolMAX™ exhalation valve releases humid and warm exhaled air, preventing heat build-up underneath the mask, allowing you to stay cool.
