

## Inductive Proximity Sensors

### P100 18mm Inductive Proximity Switch

- Inductive sensor designed to detect shaft speed, shaft position, gate position, or object presence
- Totally sealed construction
- Multi-voltage 24 - 240 VAC/VDC
- Detects ferrous targets up to 5/16" (8 mm)
- IP 65 Protection

### P300 30mm Inductive Proximity Switch

- Inductive sensor designed to detect shaft speed, shaft position, gate position, or object presence
- Totally sealed construction
- Multi-voltage 24 - 240 VAC/VDC
- Detects ferrous targets up to 15/32" (12 mm)
- IP 65 Protection

### P800 DIN Style Inductive Proximity Switch

- Detects the presence of metallic objects in hazardous areas such as handling, storage, packaging, conveying, assembly, processing, etc.
- Detects the position of doors, slides, gates and containers
- Four outputs available (NPN/PNP, changeover relay, opto-isolated bilateral FET)
- LED status indication lights
- Integrated 1/2" NPT conduit entry
- Detects up to 12mm

## Inductive Sensor Accessories

### Whirligig® & Mag-Con™

- Combination target, bracket and guard for simple sensor installation
- Suitable for all 4B sensors & other standard inductive proximity sensors
- Not affected by shaft or machine vibration
- Easy to install, safe and reliable
- Optional magnetic Mag-Con simplifies mounting
- Heavy duty all stainless steel version available

### Speed Relay

- When used in conjunction with a drive shaft encoder, wheel encoder or a proximity switch, it allows the detection of speed
- Detects under-speed
- Adjustable timer for start-up delay (SR1V5)

Cert: ATEX Zone 20 & Zone 0
