

Dräger

Dräger Pac® Series Single Gas Detectors

The Dräger Pac® series is composed of fast, accurate, reliable and easy-to-use personal single gas detectors. The devices are extremely robust, featuring clear warning signals and language-free displays. Their cutting-edge sensor technology delivers reliable results every time.

INNOVATIVE DESIGN

Dräger Pac devices are small and portable, but packed with several innovations. The requirements for the various uses and applications in the industrial sector were carefully considered during their development.

ROBUST AND CLEAR

The impact-resistant and chemical-resistant rubber housing meets the requirements of IP68 so that the devices can be exposed to spray water. A stable and rotating alligator clip ensures secure fastening to the clothing of the worker. Hi-Vis colored (yellow for H_2S) overlays help distinguish the gases monitored from a distance.

UNAMBIGUOUS RESULTS

The devices are easy to use with one hand even when wearing gloves and they continuously provide clear and unambiguous results. The large numeric LCD display is designed without text and has a backlight that ensures good readability even in the dark.

In addition to vibration and acoustic multi-tone alarms, the instruments emit an optical alarm signal clearly visible from any direction; the LEDs at the top and bottom of the unit flash brightly.

ADVANCED TECHNOLOGY

Equipped with the latest Dräger XXS miniature sensor technology, Dräger Pac series represents excellence in the field of gas detection. The devices are extremely durable, highly responsive, and have a variety of features for capturing events including the ability to adjust the frequency of functional tests and calibrations individually.

SAFETY FIRST

Maximum safety is ensured even when the device is carried in a pocket or a gas input is accidentally covered. The clever positioning of the sensor allows safe measurements both from above and in front of the device.

Dräger Pac® 3500

Dräger Pac® 5500

Dräger Pac® 7000

Key features of the Pac series

DRÄGER PAC 3500

- Measures carbon monoxide, hydrogen sulfide, or oxygen
- Service life of 2 years
- Event logger for up to 60 events
- Warranty of 2 years
- Rapid functional tests on site

DRÄGER PAC 5500

All advantages of the Dräger Pac 3500 plus:

- No limit to the service life of the device
- Service:
 Easy to replace batteries and sensors
 Replaceable dust and water filters
- Estimated sensor service life of 5 8 years

DRÄGER PAC 7000

All advantages of the Dräger Pac 5500 plus:

- Measures carbon dioxide, sulfur dioxide, chlorine, hydrogen cyanide, ammonia, nitrogen dioxide, nitric oxide, phosphine, or organic vapors
- Optional 5 year of warranty* for the H2S, O2, and CO devices
- Data logger for storage of gas concentrations and events with date and time (120 hours at 1 record per minute)
- Configurable TWA and STEL alarms
- Recording maximum concentrations
- Automatic function test option

TESTS FOR YOUR SAFETY

According to the international guidelines OSHA – ISEA, IEC 60079-29-2, DIN EN60079-29-2 and 836/BGI testing of gas detection and warning devices function tests and a known concentration of gas in certain specified intervals is required. These tests not only check whether the gas to be measured reaches

the sensor through the dust and water filter, they also test whether it is correctly calibrated and the alarms are set correctly and working properly.

The devices of the Pac series feature individually adjustable functional tests and calibration intervals. A warning symbol indicates when a functional test or

calibration is required. Depending on the application, the functional test and calibration may have to be carried out daily if the test was not completed successfully.

If the test is not carried out or if it fails, the device can automatically display an error message to inform the user that the device is not operational.

1.800.KC.SUPPLY

DRÄGER BUMP TEST STATION

The Dräger bump test station is available for the Dräger Pac series devices to carry out the functional tests quickly, easily and without a PC or additional power source.

CALIBRATION MADE EASY

Dräger X-dock® gives you full control over your Dräger portable gas detection instruments when regularly using a large number of Pac devices. Automatic bump tests and calibrations with reduced test gas consumption and short test duration save time and money. Extensive documentation and reports keep track of data.
